PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience building and shipping production-grade web applications. Proficient in React, Angular, Next.js, Node.js, Express, TypeScript, MongoDB, and Socket.IO. Passionate about architecting scalable systems, real-time features, and clean backend design.

EXPERIENCE

Software Engineer

Mar 2025 – Present

AAPGS Private Limited

Madurai, Tamilnadu

- Engineered scalable full-stack applications using React, Angular, Next.js, Node.js, TypeScript, and MongoDB from REST API design to production deployment.
- Optimized MongoDB aggregation pipelines and backend logic for analytics dashboards, resolving data accuracy issues across reporting and shift calculation modules.
- Implemented real-time features using Socket.IO across multiple production applications, including live data updates, notifications, and event-driven UI rendering.
- Architected multi-tenant systems with dynamic database switching and JWT-based authentication across production applications.

Web Developer

Dec 2024 – Feb 2025

E-Careerpluz Private Limited

Madurai, Tamilnadu

- Delivered a responsive business website offering digital services, consulting, and legal advisory.
- Implemented backend functionality using PHP to handle contact forms, subscription emails, and notifications.
- Crafted interactive user interfaces using HTML, CSS, and JavaScript to enhance user experience.

PROJECTS

DeployDock | *Next.js, Node.js, TypeScript, MongoDB, SSH, PM2, SSE* | [GitHub](#)

Personal Project

- Developed a self-hosted CI/CD platform supporting SSH-based remote deployments with PM2 process management and git-based rollbacks.
- Architected multi-tenant isolation with per-tenant MongoDB databases and AES-256-CBC encrypted SSH credentials.
- Implemented real-time log streaming via SSE using worker threads for non-blocking deploy pipelines.
- Integrated GitHub OAuth and webhook-based auto-deploy with commit SHA tracking and deployment history.
- Integrated React Flow to deliver a visual no-code automation editor supporting conditional notification workflows across SMTP, ZeptoMail, Twilio, and Meta WhatsApp API.

ProfluxIoT | *Angular, Node.js, MongoDB, Redis, Socket.IO, ECharts*

AAPGS Private Limited

- Architected a scalable IoT platform with multi-tenant architecture using dynamic database switching based on JWT authentication.
- Delivered a configurable dashboard system with drag-and-drop real-time ECharts and table widgets with user-level assignment.
- Reduced database write operations by 98% by batching 50 documents per insertMany in background workers instead of individual inserts.
- Eliminated per-emit MongoDB reads by caching dashboard metadata in Redis with NX locks, reducing query latency on every real-time data push.
- Engineered a visual automation engine using FoblexFlow enabling conditional workflows (HTTP, Email, WhatsApp) per device.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frameworks: React, Next.js, Angular, Node.js, Express.js

Databases: MongoDB, Redis

Tools & Libraries: Socket.IO, Git, PM2, WebRTC, ECharts

EDUCATION

The Madura College

Bachelor of Arts in Information Technology , CGPA : 7.61

Madurai, Tamilnadu

Aug. 2021 – May 2024
